

NARRATIVE REPORT

| | | |
|--|--|-------------------------------------|
| Establishment Name Texas Roadhouse | Address 200 W McCallard Rd Muncie IN 47302 | Inspection Date 2-28-2013 |
|--|--|-------------------------------------|

| Section# | C/NC | R | REMARKS | TO BE CORRECTED BY |
|----------|------|---|---|---|
| 295 | C | → | <ul style="list-style-type: none"> • continued - of food stuck on the cutting surfaces • Spoons stored as "clean" at the waitress station for use were observed coated & soiled with heavy food & grease. • Three salad bowls stored "as clean" on the salad prep plating station were observed soiled with food debris. Two of the three were observed with dried yellow spillage stuck to them. • Bowls in the walk-in freezer were observed with food spillage on them | Immediately Already Corrected Already Corrected |
| 295 | NC | ✓ | <ul style="list-style-type: none"> • The following non-food contact surfaces were observed up-clean. The shelving in the dry storage area had food spillage. | 1 week |
| 324 | C | ✓ | The "wash" sprayer sink in the dishroom has become unwelded | In process of being repaired |
| 437 | C | | Two un-marked spray bottles were observed stored in the grill area. One bottle was open exposing the liquid (sprayer was missing). | Half hour |
| 303 | C | | <ul style="list-style-type: none"> • Food Contact surfaces are not sanitized because they are still coated in food debris & grease. Ceramic dishes going through the ware washing machine did not fully reach 180°F after three times through the machine. "Clean" equipment was observed coming out of the ware washing machine with food accumulation, debris & grease still on them. | Contacted Service Provider |
| 304 | NC | | "Clean" Food contact & non food contact equipment, dishes & bowls were observed stored stacked together but wet. Bowls used to serve chilled or frozen food stored in the walk-in freezer were stuck together because they were stored wet. | 1 hour |
| 204 | C | ✓ | <ul style="list-style-type: none"> • Non-potable drinking water was observed dripping from a pipe that had a "mold like" residue on it. Un-covered water lines to the condenser hang directly over the meat cutting area. | 1 week |
